Materialwissenschaft und Werkstofftechnik Mar 15 2021 Der Autor unternimmt mit dem Leser eine Erkundungstour durch die Vergangenheit und Gegenwart der Herstellung und Nutzung von Werkstoffen, und zwar entlang dem Entwicklungsweg einer uralten, jedem vertrauten Kulturtechnik, der Nassrasiertechnik - vom Steinschaber bis zum Hightech-Rasiergerät. Dabei lernt der Leser, wie der Umgang des Menschen mit Werkstoffen vom Handwerk zur Industrie und schließlich zu einer eigenständigen Wissenschaft geworden ist und wie Werkstoffe ganze Epochen geprägt haben. Er begegnet im Laufe dieser Exkursion Forschern und Unternehmern, die diesen Weg in zielstrebiger, oft mühevoller Arbeit erschlossen haben. Im Dialog mit dem Leser wird anhand der beschriebenen Beispiele sehr anschaulich materialwissenschaftliches und werkstofftechnisches Grundwissen vermittelt, das notwendig ist, um zu verstehen, wovon die Eigenschaften von Werkstoffen abhängen, wie man sie prüfen und gezielt beeinflussen kann. Und es wird demonstriert, dass es nicht allein von seinen Eigenschaften abhängt, ob ein neuer Werkstoff in der Industrie angewendet wird, sondern dass dazu bei seiner Entwicklung von vornherein auch andere Kriterien sowie mögliche Risiken zu bedenken sind. Der Autor möchte Abiturienten anregen, Materialwissenschaft und Werkstofftechnik zu studieren, obwohl die meisten in der Schule darüber noch nichts gehört haben; er möchte Studieneinsteigern technischer Fachrichtungen helfen, sich auf diesem vielfältigen Gebiet zu orientieren, und er möchte einer breiteren Öffentlichkeit bewusst machen, dass Werkstoffe nicht nur vergangene Epochen geprägt haben, sondern dass „Hightech“, auf die wir heute tagtäglich und überall angewiesen sind, höchstens eine reizvolle Idee wäre, die ohne neue Werkstoffe niemals hätte zünden können.

Hoelderlin Aug 27 2019 Seit ihn vor sechs Jahren seine große Liebe verlassen hat, versucht Hoelderlin, sich mit allen Mitteln zu zerstören. Er raucht, trinkt, schläft nicht mehr richtig und er verabscheut seine Mitmenschen wegen ihrer Macken und falschen Wertvorstellungen. Seine einzige Freundin ist Facebook. Ihr teilt Hoelderlin seine Sorgen mit, schickt seine bedeutsamen Gedanken in das World Wide Web hinaus, im Wissen, dass sie niemanden interessieren, nicht einmal die NSA. Doch Hoelderlin will sich ändern, glücklich sein. Aber kann sich ein zynisches Arschloch wie er mit dieser verkorksten Welt arrangieren? "Karuso exerziert eine in ihrer Schonungslosigkeit gleichermaßen schockierende, wie begeisternde Bestandsaufnahme von Bedingungen eines bewussten Scheiterns und Entsagens und lässt ein Ich erzählen, dessen Verhältnis zur Welt durch den Begriff ‚Enttäuschung‘ allein nicht annähernd mehr zum Ausdruck zu bringen ist. Dieser Episoden-Roman ist weit mehr als Hyperion 2.0." Wehwalt Koslovsky, Poetry Slam-Weltmeister 2000 "In ‚Hoelderlin‘ geht Laander Karuso im Gegensatz zu vielen anderen Autoren nicht den Weg des geringsten Widerstands. Er schafft es, dass der Leser den Protagonisten immer wieder hassen möchte, vielleicht grade weil man sich beim Lesen immer wieder aufs Neue ertappt fühlt. Denkt man nicht oft die gleichen Dinge?" Jessy James LaFleur, Spoken-Word-Künstlerin

Linguistic Theory and Empirical Evidence Jun 05 2020 This volume further elaborates the empirical tradition of Columbia School (CS) Linguistics by offering diverse empirical analyses for a wide variety of languages. These studies open a much needed debate advocating the necessity of the independent validation of linguistic hypotheses. This research exemplifies how such a validation should be conducted by determining which forms underlie the analyses and extracting those observations that are considered to be objective. The volume consists of two parts: a section on synchronic and diachronic grammatical problems and a section on Phonology as Human Behavior (PHB), the Columbia School version of phonology, applied to evolutionary, developmental and clinical issues and the phonotactics of the selected lexicon of a literary text. It provides a wealth of useful empirical data and in-depth and sophisticated qualitative and quantitative analyses of a broad range of languages from diverse families: French, Spanish, Afrikaans, Dutch, English, Polish, Russian, Japanese, and Hebrew.

Marketing Planning by Design Nov 22 2021 Marketing is under immense pressure to perform: required to submit reports to management, judged by the sales department based on whether it helps sales, scrutinized by financial controlling regarding how efficiently it uses budgets, and last but not least, under constant review by customers, markets and the public. Marketing faces more dilemmas and conflicts of interest than any other part of a company. The reason for this lies in the lack of a plan for marketing planning. This book not only identifies numerous examples of this problem as experienced by businesses, it also offers ways of solving the problem. Ralf Strauss highlights a 7 phase process for marketing planning, where the potential marketing can reach is demonstrated. Useful check lists included in this book allow the readers to readily create their own ‘plans for a marketing planning’. With insights drawn from more than 150 case studies included in the book, Marketing Planning by Design covers areas such as: How to overcome existing hurdles of marketing planning and marketing strategy. How to set up a project for managing the marketing planning cycle. How to develop a really target group and content driven marketing planning, which is stepwise cascaded from a program, campaign down to a tactical level. How to make marketing accountable in terms of performance measurement. How to implement an enhanced marketing planning in the organisation. How to systematically integrate Web 2.0 into marketing planning, or how to link marketing with modern IT. This highly practical book is destined to be a must-have reference work on any marketer’s desk.

Die Entwicklung effektiver Markennamen Aug 20 2021 Inhaltsangabe:Einleitung: Namen, in Form von Produktkennzeichnungen, sind zu einem selbstverständlichen Bestandteil unseres Alltags geworden. Längst ist ihre Präsenz eine Selbstverständlichkeit: Am Morgen verwenden wir Rama oder Nutella als Brotaufstrich, dazu trinken wir eine Tasse Jacobs Krönung oder ein Glas Hohes C. Wenn wir abends ausgehen, genießen wir einen Bacardi mit Coca-Cola. Um am nächsten Tag auf die Folgen übermäßigen Alkoholgenusses zu reagieren, greifen wir auf eine Aspirin zurück. Dicht ist das Netz, das Markennamen über die außersprachliche Wirklichkeit gestülpt haben: Markennamen sind zu Aktiva in unserem Wortschatz geworden. Zu generischen Namen emporgekommene Produktkennzeichen, wie Coca-Cola oder Aspirin, wurden sogar schon durch den Eintrag ins Wörterbuch geadelt. Bei diesem selbstverständlichen Umgang mit Produktnamen ist leicht zu vergessen, welche unterschiedlichen Aufgaben sie zu erfüllen haben. Gerade diese offensichtliche, alltägliche Präsenz von Produktnamen sollte jedoch deren Stellung hervorheben und das Bewusstsein um die Komplexität der Namensschöpfung bei den Verantwortlichen schärfen. Das Gegenteil ist der Fall: Die Herausforderung Namensschöpfung wird von vielen Unternehmen verkannt. Ein aktuelles Beispiel für die Unterschätzung der Komplexität sowie der Vernachlässigung des Gebots der Akribie bei der Namensschöpfung liefert der Volkswagenkonzern. Eines ihrer neuesten Automobile haben die Volkswagenmanager auf den Namen "Phaeton" getauft. Mit diesem wollen sie erstmals Konkurrenten wie den 7er BMW oder die Mercedes S-Klasse im Luxussegment attackieren. Dem Eifer bei der Namenssuche fehlte die nötige Weitsicht: Phaeton ist, laut der griechischen Mythologie, der Sohn des Sonnengottes Helios. Nach der Legende brachte Phaeton, als der Vater dem Sohn das Steuer des Sonnenwagens anvertraute, das Gefährt zum Absturz. Die Absturzstelle setzte sich in Brand und prompt wurde Phaeton von Zeus mit einem Blitz bestraft. In Besinnung an die Legende wurden zu Beginn des letzten Jahrhunderts bestimmte kleine, vierrädrige Kutschwagen verächtlich mit dem Namen Phaeton etikettiert. Da das Unternehmen Volkswagen ausdrücklich auf die griechische Mythologie hinwies, kam es zu spöttischen Anmerkungen. Kurzfristig wurde intern über eine Namensänderung nachgedacht. Neben den unwillkommenen Assoziationen durch die Erzählung aus der griechischen Mythologie ist die Verwendung des Namens noch aus anderen Gründen heikel: es ist ein nach [...]

The Cognitive Neuroscience of Metacognition May 05 2020 Metacognition is the capacity to reflect upon and evaluate cognition and behaviour. Long of interest to philosophers and psychologists, metacognition has recently become the target of research in the cognitive neurosciences. By combining brain imaging, computational modeling, neuropsychology and insights from psychiatry, the present book offers a picture of the metacognitive functions of the brain. Chapters cover the definition and measurement of metacognition in humans and non-human animals, the computational underpinnings of metacognitive judgments the cognitive neuroscience of self-monitoring ranging from confidence to error-monitoring and neuropsychiatric studies of disorders of metacognition. This book provides an invaluable overview of a rapidly emerging and important field within cognitive neuroscience.

Plunkett's Wireless, Wi-Fi, RFID and Cellular Industry Almanac 2008 Jan 25 2022 The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.

Kingdom Come Sep 28 2019 2015. The United Kingdoms just discovered enough oil to guarantee prosperity for the next 100 years. The Government sees this as the final cog in its project to make the United Kingdom the enterprise capital of the world and to restore the countrys greatness. The only problem is that most of the oil lies off Scotland and Wales. And the Scots and Welsh want their share of the bonanza. Over the next six years, the United Kingdom descends into a spiral of conflict in which old

nationalisms re-emerge and threaten to drag in European neighbours and the United States as the violence spills over beyond the countrys boundaries.
