Controversial Issues In Prisons Jan 01 2020 Controversial Issues in Prisons is a textbook designed to explore eight of the most controversial aspects of imprisonment in England and Wales today. It is primarily a book about the people who are sent to prison and what happens to them when inside. Each chapter examines a different dimension of the prison population and draws upon the sociological imagination to make connections between the personal troubles and vulnerabilities of those incarcerated with wider structural divisions which plague the society we live in. The book investigates controversies surrounding the incarceration of people with mental health problems, women, children, foreign nationals, offenders' with suicidal ideation, sex offenders, drug takers and the collateral consequences of incarceration on prisoners' families. Each chapter on these eight substantive topics shares a common structure and answers the following key questions: How have people conceptualised this penal controversy? What does the official data tell us and what are its limitations? What is its historical context? What are the contemporary policies of the Prison Service? Are they legitimate and, if not, what are the alternatives? Ultimately the authors argue that in combination these controversial issues raise fundamental concerns about the legitimacy of the confinement project and the kind of society in which it is deemed essential. The book concludes with a discussion of why it remains important to make penal controversies visible, challenge penological illiteracy and provide alternative means of responding to human wrongdoing rooted in the principles of human rights and social justice.

Managerial Accounting Aug 27 2019 "This book is intended to drive home the fundamental ideas of managerial accounting and motivate students to actually want to study the subject. As you will see, the text has a number of unique features that help accomplish these goals. Based on my teaching experience and from what we have heard from professors using the previous editions, we believe students and professors want a textbook that: Recognizes that most students will become managers, not accountants Focuses attention on decision making Stresses the fact that "You Get What You Measure" Motivates students to learn managerial accounting by connecting concepts and techniques to the real world Recognizes the importance of service businesses Is clear, concise and current"
