Better Breastfeeding Aug 24 2022 The ultimate modern-day breastfeeding guide, with empowering, medically sound advice and solutions for the trickiest issues—from a pioneering ENT doctor and breastfeeding expert. In today's breastfeeding-friendly environment, the pressure to nurse is intense. We hear over and over that breastfeeding is natural, and every woman can do it. The truth is, the majority of moms need help breastfeeding, but they're forced to fight through varying viewpoints from a dizzying host of sources instead of being able to turn to a doctor for advice. And when breastfeeding doesn't work, they're the ones getting blamed for failure. In [Better Breastfeeding](#), you will find information, not opinions: science-backed facts to help you make informed decisions, without feeling ashamed or bullied. Dr. Linda Dahl presents a new paradigm for breastfeeding based on diagnosing and treating mothers and babies using anatomy and physiology, offering a comprehensive overview of how breastfeeding works, why it fails, and what to do about it. Dr. Dahl takes you through the basics of breastfeeding in a week-by-week guide and explores solutions for little-understood difficulties like gape restriction and tongue tie, nipple and breast pain, issues with milk supply, or abnormal nursing behaviors. [Better Breastfeeding](#) is the no-holds-barred primer that every mom needs before and during her breastfeeding journey so she can advocate for herself and her baby.

Better Law for a Better World Jul 11 2021 How as a society can we find ways of ensuring the people who are the most vulnerable or have little voice can avail themselves of the protection in law to improve their social, cultural, health and economic outcomes as befits civilised society? [Better Law for a Better World](#) answers this question by looking at innovative practices and developments emerging within law practice and education and shares the skills and techniques that could lead to confidence in the law and its ability to respond. Using recent research from Australia, practice initiatives and information, the book breaks down ways for law students, legal educators and law practitioners (including judicial officers, law administrators, legislators and policy makers) to enhance access to justice and improve outcomes through new approaches to lawyering. These can include: Multi-Disciplinary Practice (including health justice partnerships); integrated justice practice; restorative practice; empowerment modes (community & professional development and policy skills); client-centred approaches and collaborative interdisciplinary practice informed by practical experience. The book contains critical information on what such practice might look like and the elements that will be required in the development of the essential skills and criteria for such practice. It seeks to open up a dialogue about how we can make the law better. This includes making the community more central to the operation of the law and improving client-centred practice so that the Rule of Law can deliver on its claims to serve, protect and ensure equality before the law. It explores practical ways that emerging lawyers can be trained differently to ensure improved communication, collaboration, problem solving, partnership and interpersonal skills. The book explores the challenges of such work. It also gives suggestions on how to reduce professional barriers and variations in practice to effectively, humanely and efficiently make a difference in people's lives. The book builds essential skills and new approaches to lawyering for law students, legal educators, new lawyers and seasoned lawyers, judicial members and law administrators to equip them to better respond to community need. It looks at the law in context by also exploring the role of the law in improving the social determinants of health and socially just outcomes.

I Can Do Better All By Myself Mar 07 2021 The Singles Ministry at New Day Temple of Faith is beginning to unravel, and the pastor is considering dissolving it. Some members believe the only way to hold it together is by getting their pastor to join. And why shouldn't their leader show support by joining, considering the pastor's own single status? Some church members support the idea, while others frown upon the fact that they are being led by a shepherd who is single in the first place. It becomes an all-out war, with one side wanting the pastor to embrace singlehood, while others secretly play matchmaker. Marriage has been the furthest thing from the pastor's mind, not because there hasn't been an opportunity, but because there really hasn't been time. With a needy congregation facing trials and tribulations, Pastor has no time to play the dating game. Being a pastor on call twenty-four seven, who has time for a serious relationship, other than the one with God? Eventually, decisions have to be made around New Day. Will these decisions mend the ministry or destroy the church?

Gutes besser tun Oct 26 2022 Soll ich einen Flüchtling bei mir beherbergen? Ist es sinnvoll, nach Naturkatastrophen zu spenden? Übernehme ich besser die Patenschaft für ein Kind aus Äthiopien oder für ein Kind aus Deutschland? Hilfe ich den Betroffenen, oder beruhige ich nur mein Gewissen? William MacAskill hat mit dem Konzept des effektiven Altruismus eine Antwort gefunden. Er nennt die Kriterien für sinnvolles und nachhaltiges Helfen. Oft sind es scheinbar kleine Handlungen, die Großes bewirken. Eine einfache Wurmkur verbessert die Lebensqualität afrikanischer Kinder mehr als eine teure Wasserpumpe fürs ganze Dorf. MacAskill zeigt, warum gut gemeint und gut gemacht zwei verschiedene Dinge sind und wie wir Veränderungen am besten erreichen können. Sein Buch ist eine konkrete Handreichung für alle, die Gutes noch besser tun wollen.

Better Doctors, Better Patients, Better Decisions Apr 20 2022 How eliminating "risk illiteracy" among doctors and patients will lead to better health care decision making. Contrary to popular opinion, one of the main problems in providing uniformly excellent health care is not lack of money but lack of knowledge—on the part of both doctors and patients. The studies in this book show that many doctors and most patients do not understand the available medical evidence. Both patients and doctors are "risk illiterate"—frequently unable to tell the difference between actual risk and relative risk. Further, unwarranted disparity in treatment decisions is the rule rather than the exception in the United States and Europe. All of this contributes to much wasted spending in health care. The contributors to **Better Doctors, Better Patients, Better Decisions** investigate the roots of the problem, from the emphasis in medical research on technology and blockbuster drugs to the lack of education for both doctors and patients. They call for a new, more enlightened health care, with better medical education, journals that report study outcomes completely and transparently, and patients in control of their personal medical records, not afraid of statistics but able to use them to make informed decisions about their treatments.
