Global Shadows Mar 15 2021 Both on the continent and off, “Africa” is spoken of in terms of crisis: as a place of failure and seemingly insurmountable problems, as a moral challenge to the international community. What, though, is really at stake in discussions about Africa, its problems, and its place in the world? And what should be the response of those scholars who have sought to understand not the “Africa” portrayed in broad strokes in journalistic accounts and policy papers but rather specific places and social realities within Africa? In *Global Shadows* the renowned anthropologist James Ferguson moves beyond the traditional anthropological focus on local communities to explore more general questions about Africa and its place in the contemporary world. Ferguson develops his argument through a series of provocative essays which open—as he shows they must—into interrogations of globalization, modernity, worldwide inequality, and social justice. He maintains that Africans in a variety of social and geographical locations increasingly seek to make claims of membership within a global community, claims that contest the marginalization that has so far been the principal fruit of “globalization” for Africa. Ferguson contends that such claims demand new understandings of the global, centered less on transnational flows and images of unfettered connection than on the social relations that selectively constitute global society and on the rights and obligations that characterize it. Ferguson points out that anthropologists and others

who have refused the category of Africa as empirically problematic have, in their devotion to particularity, allowed themselves to remain bystanders in the broader conversations about Africa. In *Global Shadows*, he urges fellow scholars into the arena, encouraging them to find a way to speak beyond the academy about Africa's position within an egregiously imbalanced world order.

Democracy, Civic Culture and Small Business in Russia's Regions Oct 22 2021 This book adopts a novel analytical approach to understanding how Russia's stalled democratisation is related to the incomplete liberalisation of the economy. Based on extensive original comparative study of Russia's regions, the book explores the precise channels of interaction that create the mutuality of property rights, entrepreneurship, rule of law, norms of citizenship and liberal democracy. It demonstrates that the extent of democratisation varies across regions, and that this variation is connected to the extent of liberalisation of the economy. Moreover, it argues that the key factor in producing this linkage is the relative prominence of small business owners and their supporters in articulating their interests vis-à-vis regional and local administrations, especially through the institutionalisation of networks and business associations. The book develops its key theses by means of detailed analysis of the experiences of four case study regions. Overall, the book provides a major contribution to understanding the path of democratisation in Russia.

Private Regierung Apr 15 2021 Als Adam Smith und andere die Theorie freier Märkte entwickelten, war das ein progressives Projekt: Die Freiheit der Märkte sollte auch zur Befreiung der Lohnabhängigen führen - von den Zwängen obrigkeitsstaatlicher Strukturen, vor allem aber von der Gängelung durch die Arbeitgeber. In ihrem furiosen Buch zeigt Elizabeth Anderson, was aus dieser schönen Idee geworden ist: reine Ideologie in den Händen mächtiger ökonomischer Akteure,

die sich in Wahrheit wenig um die Freiheit und die Rechte von Arbeitnehmern scheren. Bereits die Industrielle Revolution hat den vormals positiven Zusammenhang zwischen freiem Markt und freiem Arbeiter aufgelöst, wie Anderson im ideengeschichtlichen Teil ihrer Untersuchung darlegt. Im nächsten Schritt bestimmt sie die gegenwärtige Beziehung zwischen Arbeitgebern und Arbeitnehmern neu: als eine von Regierungen und Regierten, wobei diese »Regierungen« private sind und quasi autokratisch herrschen können. Das Nachsehen haben die Beherrschten, nämlich die Arbeitnehmer, wie Anderson anhand zahlreicher Beispiele belegt. In beeindruckender Gedankenführung und stilistisch brillant dekonstruiert sie einen Mythos des Marktdenkens. Ein Glanzstück der Ideologiekritik.

The Civic Education of American Youth Sep 01 2022 Civic education plays an essential role in strengthening the democratic society, preparing informed citizens, and promoting their participation in the civic life of their communities. This project explores state K-12 civic education policies and related requirements nationwide, as well as factors that shape K-12 civic education policies and practices in school districts and schools. The first two chapters of this report provide the national and state contexts for content standards in core subject areas, including civics; review state constitutional provisions and statutes that promote civic education; and examine how social studies standards, assessment, teacher certification, and other state policies build on these provisions and statutes. Recognizing the centrality of state standards, chapters 3 through 5 examine the extent to which the civics content in state standards promotes civic dispositions, civic intellectual skills, and civic knowledge, respectively. Chapters 6 through 11 examine several influences on civic education at the district level: standards; instructional materials; assessment; professional development; extracurricular and co-curricular activities; and individuals, organizations, and funding. Chapter 12

provides recommendations for developing sustainable state and school district civics commitments that ensure systematic attention to civic education in grades K-12. Key findings from the project report are included, as are extensive chapter notes, and 47 tables of data. Seven appendices contain additional information. (BT)

Public Administration Aug 08 2020 Public Administration: Power and Politics in the Fourth Branch of Government presents public administration through the lens of politics and the policy-making power of the bureaucracy. By showing how the bureaucracy influences daily life, Smith and Licari bring the field of public administration alive for students. This text dispels the myth that the study of public administration is boring or irrelevant to students' lives by demonstrating just how deeply it pervades our lives. The authors focus on the bureaucracy--"the fourth branch of government"--as a key ingredient in politics and policy-making. This approach is novel, but it accurately reflects the true nature of public administration in America. This book examines our bureaucracy's considerable political power, where it comes from, how it is used, and how it can be controlled. Major Features: * Unique focus on political and policy-making power. This is the first public administration textbook to focus on the political and policy-making power of the bureaucracy. Without abandoning coverage of more traditional topics, this approach is more compelling to students because it demonstrates just how much influence the bureaucracy wields in our daily lives. * Highlights the tension between democracy and bureaucracy. A central paradox at the heart of the political system is democracy's reliance on the very undemocratic bureaucratic institutions that characterize the administrative branch of government. This text seeks to explain why and lay out the implications of that dependency. * Details the role and legitimacy of public administration in a democracy. There is an uneasy and fascinating relationship between the democratically elected leadership in government

and the bureaucracies needed to carry out their decisions. This tension forms a running theme throughout the book. * Solid multidisciplinary foundation. This book draws on literature by the most important academics in the fields of both public administration and political science. * Readability. Smith and Licari write in an engaging, informal style that is rich in lively examples and free of academic jargon. Key terms are included in a glossary.

Civic Media Literacies (Open Access) Jan 13 2021 Civic life today is mediated. Communities small and large are now using connective platforms to share information, engage in local issues, facilitate vibrant debate, and advocate for social causes. In this timely book, Paul Mihailidis explores the texture of daily engagement in civic life, and the resources—human, technological, and practical—that citizens employ when engaging in civic actions for positive social impact. In addition to examining the daily civic actions that are embedded in media and digital literacies and human connectedness, Mihailidis outlines a model for empowering young citizens to use media to meaningfully engage in daily life.

Die Idee der Gerechtigkeit Feb 11 2021 Drei Kinder streiten darüber, wem von ihnen eine Flöte gehören sollte. Das erste Kind hat Musikunterricht gehabt und kann als einziges Flöte spielen. Das zweite ist arm und besitzt keinerlei anderes Spielzeug. Das dritte Kind hat die Flöte mit viel Ausdauer selbst angefertigt. Mit diesem Gleichnis eröffnet Amartya Sen, einer der wichtigsten Denker unserer Zeit, sein Buch über die Idee der Gerechtigkeit. Es ist John Rawls gewidmet und grenzt sich doch von der wirkungsmächtigsten Gerechtigkeitstheorie des 20. Jahrhunderts ab. Wer eine weitere abstrakte Diskussion der institutionellen Grundlagen einer gerechten Gesellschaft erwartet, der wird enttäuscht sein. Wer sich hingegen darüber wundert, was diese Theorien

eigentlich zur Bekämpfung real existierender Ungerechtigkeiten beitragen, der wird großen Gewinn daraus ziehen. Sen nämlich stellt die Plausibilität solcher Anstrengungen der reinen Vernunft in Frage. Seine Theorie der Gerechtigkeit ist weniger an der Ausformulierung einer ethisch perfekten Gesellschaft interessiert als an Argumenten, deren Maßstab die konkrete Überwindung von Ungerechtigkeit ist. Sen eröffnet Perspektiven, die dem westlichen Denken meist fehlen. Seine Kenntnis der hinduistischen, buddhistischen und islamischen Kultur ist wundervoll eingewoben in das Buch und prägt den ganzen Charakter seines Philosophierens. Die Vernunft sucht die Wahrheit, wo immer sie sich finden lässt - und wie der Autor dieses außergewöhnlichen Werkes entdeckt sie auf ihrer weiten Reise viele gangbare Wege zu einer gerechteren Welt.

Moorish American Civics Guide Nov 03 2022 This civics guide is designed for those who lack the proper civic/civil education needed to carry on as true citizens in this American life. This guide stresses the importance of civic education among children especially and how the parents can scenario instances of government functions like townhall meetings or city board meetings. This guide is an excellent teaching tool for making our people better citizens so that they may learn to live the life and pull themselves out of despair and be respected finally by the government in which we live and the nations of the earth.

Civic Learning for Alienated, Disaffected and Disadvantaged Students Jun 29 2022 In their journeys to engaged citizenship, civic education is a right for all students, helping them to become active and informed. However, for some students, there are barriers to engagement. It is these barriers that are dealt with in this book. Civic education is a key component of the school curriculum irrespective of country and political system. Ensuring that young people understand the political and social contexts of their country, and indeed their planet, is a key requirement in a rapidly changing and unpredictable world. Providing access to civic learning, therefore, is a priority for schools and the societies in which they are embedded. Yet, for some students, barriers exist which prevent a deep understanding of the requirements for full participation and engagement. These students are neglected not only in schools but in research as well. This book seeks to fill that gap by shining a light on the multiple disadvantages that many students suffer in seeking to exercise their rights as active and informed citizens. The chapters in this book were originally published as a special issue of *Educational Psychology*.

Human Rights, Power and Civic Action Aug 27 2019 *Human Rights, Power and Civic Action* examines the interrelationship between struggles for human rights and the dynamics of power,

focusing on situations of poverty and oppression in developing countries. It is argued that the concept of power is a relatively neglected one in the study of rights-based approaches to development, especially the ways in which structures and relations of power can limit human rights advocacy. Therefore this book focuses on how local and national struggles for rights have been constrained by power relations and structural inequalities, as well as the extent to which civic action has been able to challenge, alter or transform such power structures, and simultaneously to enhance protection of people's basic human rights. Contributors examine and compare struggles to advance human rights by non-governmental actors in Cambodia, China, Ghana, Kenya, South Africa and Zimbabwe. The country case-studies analyse structures of power responsible for the negation and denial of human rights, as well as how rights-promoting organisations challenge such structures. Utilising a comparative approach, the book provides empirically grounded studies leading to new theoretical understanding of the interrelationships between human rights struggles, power and poverty reduction. Human Rights, Power and Civic Action will be of interest to students and scholars of human rights politics, power, development, and governance.

Civic Engagement as an Educational Goal May 17 2021 A modern democratic society depends on the civic engagement of its citizens. Growing cultural pluralism and economic globalization have brought greater complexity to all areas of life. Young people in particular need diverse opportunities in order to enrich their experience, to learn about civic responsibility and to strengthen their communities. Furthermore, the topic is important since it shapes a path to overcome social inequalities in education and to use the untapped potential for-and declining interest in-political participation among youth. With the 2007 Carl Bertelsmann Prize for Civic Engagement as an

Educational Goal the Bertelsmann Stiftung presents approaches in diverse countries and discusses how they meet the challenge to promote civic engagement in schools and early childhood education and care. The report also gives a short overview of the status quo of civic engagement in Germany and suggests some reforms for the future.

Multicultural Curriculum Transformation in Social Studies and Civic Education Jan 25 2022

This book focuses on multicultural curriculum transformation in social studies and civic education subject areas. The discussion of each area outlines critical considerations for multicultural curriculum transformation for the area by grade level and then by eight organizing tools, including content standards, relationships with and among students and their families, and evaluation of student learning and teaching effectiveness. The volume is designed to speak with PK-12 teachers as colleagues in the multicultural curriculum transformation work. Readers are exposed to “things to think about,” but also given curricular examples to work with or from in going about the actual, concrete work of curriculum change. This work supports PK-12 teachers to independently multiculturally adapt existing curriculum, to create new multicultural curriculum differentiated by content areas and grade levels, and by providing ample examples of what such multicultural transformed social studies and civic education curricula looks like in practice.

[Reimagining Civic Education](#) Oct 02 2022 This volume surveys the new global landscape for democratic civic education. Rooted in qualitative research, the contributors explore the many ways that notions of democracy and citizenship have been implemented in recent education policy, curriculum, and classroom practice around the world. From Indonesia to the Spokane Reservation and El Salvador to Estonia, these chapters reveal a striking diversity of approaches to political socialization in varying cultural and institutional contexts. By bringing to bear the methodological,

conceptual and theoretical perspectives of qualitative research, this book adds important new voices to one of education's most critical debates: how to form democratic citizens in a changing world.

Government Performance Management in China Jul 27 2019 This book explains the basic concepts of the performance management, including the achievement of government goals, management capacity, administrative efficiency and policy effects. Taking Hangzhou, one of the largest cities in China, as an example, the book offers readers a new dimension through which the government can be understood and reformed—performance. Performance management has become an important component of public administration in China, and its use is beneficial in evaluating performance and social benefit. It also incentivizes civil servants to become more motivated and innovative, prevents the development of a bureaucratic atmosphere and facilitates communication between the public sector and the people. The book first introduces the concept of the performance management, providing a detailed description of its history, basic theories and its development. It then discusses the evolution of the system (from objective-based responsibility system evaluation to “vote for excellence”), its three basic areas (performance management on the national, local and municipal levels) and its key components: openness, democracy, accountability and performance. This book allows readers to gain a deeper understanding of the importance of government performance management in China and its contribution to the modernization of state governance and political legitimacy.

Guns and Government Jun 25 2019 The book is part of a wider study of the management of contemporary peace processes and has a strong comparative theme. It draws heavily on interviews with key players (politicians and policymakers) in the peace process. Darby and Mac Ginty identify six key strands in the Northern Ireland peace process and assess how factors in each facilitated or

obstructed political movement. Chapters are devoted to political change, violence and security, economic factors, external influences, popular responses, and the role of images and symbols.

Civic Virtues Jan 01 2020 Although few want to deny the importance of individual rights, many political theorists have recently complained that their importance has been greatly over-emphasized. The result, as they see it, is an excessive individualism that blinds people to the needs of the community or state to which they belong. We should be less concerned with our rights, in their view, and more concerned with our responsibilities. Those who advanced this view typically argue against liberalism. In *Civic Virtues*, a compelling addition to the distinguished Oxford Political Theory series, Richard Dagger takes a different approach. Finding the proper relationship between rights and responsibilities requires us not to choose between liberalism and republicanism, he argues, but to unite them in a republican form of liberalism. Is such a marriage of republicanism and liberalism possible? Is it desirable? Dagger demonstrates how republican liberalism proceeds from a fundamental right of autonomy, to the recognition of interdependence and reciprocity, and on to the cultivation of the civic virtues of the public-spirited citizen. Indeed, republican liberalism promises not only to reconcile individual rights and civic duties, but to enhance political deliberation and the sense of community as well. Timely, vigorous, and accessibly written, *Civic Virtues* will be crucial interest to students of political philosophy and to all who hope to revive civic life.

Speech and Debate as Civic Education Apr 27 2022 In an era increasingly marked by polarized and unproductive political debates, this volume makes the case for a renewed emphasis on teaching speech and debate, both in and outside of the classroom. Speech and debate education leads students to better understand their First Amendment rights and the power of speaking. It teaches

them to work together collaboratively to solve problems, and it encourages critical thinking, reasoned and fact-based argumentation, and respect for differing viewpoints in our increasingly diverse and global society. Highlighting the need for more emphasis on the ethics and skills of democratic deliberation, the contributors to this volume—leading scholars, teachers, and coaches in speech and debate programs around the country—offer new ideas for reinvigorating curricular and co-curricular speech and debate by recovering and reinventing their historical mission as civic education. Combining historical case studies, theoretical reflections, and reports on programs that utilize rhetorical pedagogies to educate for citizenship, *Speech and Debate as Civic Education* is a first-of-its-kind collection of the best ideas for reinventing and revitalizing the civic mission of speech and debate for a new generation of students. In addition to the editors, the contributors to this volume include Jenn Anderson, Michael D. Bartanen, Ann Crigler, Sara A. Mehlretter Drury, David A. Frank, G. Thomas Goodnight, Ronald Walter Greene, Taylor W. Hahn, Darrin Hicks, Edward A. Hinck, Jin Huang, Una Kimoeko-Goes, Rebecca A. Kuehl, Lorand Laskai, Tim Lewis, Robert S. Littlefield, Allan D. Civic Power Aug 20 2021 What will it take to restore American democracy and rescue it from this moment of crisis? Civic Power argues that the current threat to US. democracy is rooted not just in

the outcome of the 2016 election, but in deeper, systemic forms of inequality that concentrate economic and political power in the hands of the few at the expense of the many. Drawing on historical and social science research and case studies of contemporary democratic innovations across the country, Civic Power calls for a broader approach to democracy reform focused on meaningfully redistributing power to citizens. It advocates for both reviving grassroots civil society and novel approaches to governance, policymaking, civic technology, and institutional design - aimed at dismantling structural disparities to build a more inclusive, empowered, bottom-up democracy where communities and people have greater voice, power, and agency.
