**Robert Altman** Jul 22 2022 Robert Altman—visionary director, hard-partying hedonist, eccentric family man, Hollywood legend—comes roaring to life in this rollicking oral biography. After an all-American boyhood in Kansas City, a stint flying bombers in World War II, and jobs ranging from dog tattoo entrepreneur to television director, Robert Altman burst onto the scene in 1970 with M\*A\*S\*H. He reinvented American filmmaking, and went on to produce such masterpieces as McCabe & Mrs. Miller, Nashville, The Player, Short Cuts, and Gosford Park. In Robert Altman, Mitchell Zuckoff has woven together Altman's final interviews; an incredible cast of voices including Meryl Streep, Warren Beatty, Paul Newman, among scores of

others; and contemporary reviews and news accounts into a riveting tale of an extraordinary life.

*Becoming a Next-Level Prophet* Jan 04 2021 Prophets aren't sharpened in an instant. They must go through a "making" process to shape their character and burn off their impurities through experiencing the ways of God. As you explore your prophetic calling, you will understand your prophetic mission--and what it takes to progress through each level on your way to fulfilling your God-given destiny. In *Becoming a Next-Level Prophet*, author, speaker, and apostolic prophet Jennifer LeClaire encourages and challenges you to sharpen your prophetic edge through obedience, willingness, humility, selflessness, prayer, warfare, holiness, faithfulness, and accountability. She urges you to mature in your

anointing and to be a good steward of the gifts with which God has entrusted you, pointing more people to Jesus. As spiritual warfare increases and the world is in desperate need for the clear voice of God, it is crucial that his prophets rise up with power and maturity.

Fracking Mar 18 2022 Since the first edition of Fracking was published, hydraulic fracturing has continued to be hotly debated. Credited with bringing the US and other countries closer to “energy independence,” and blamed for tainted drinking water and earthquakes, hydraulic fracturing (“fracking”) continues to be one of the hottest topics and fiercely debated issues in the energy industry and in politics. Covering all of the latest advances in fracking since the first edition was published, this expanded and updated revision still contains all of the valuable original content for the engineer or layperson to understand the technology and its ramifications. Useful not only as a tool for the practicing engineer solve day-to-day problems that come with working in hydraulic fracturing, it is also a wealth of information covering the possible downsides of what many consider to be a very valuable practice. Many others consider it dangerous, and it is important to see both sides of the argument, from an apolitical, logical standpoint. While induced hydraulic fracturing utilizes many different engineering disciplines, this book explains these concepts in an easy to understand format. The primary use of this book shall be to increase the

awareness of a new and emerging technology and what the various ramifications can be. The reader shall be exposed to many engineering concepts and terms. All of these ideas and practices shall be explained within the body. A science or engineering background is not required.

**Self-Interest: Volume 14, Part 1** Dec 03 2020 '[T]he good man should be a lover of self.' Aristotle wrote. 'For he will both himself profit by doing noble acts, and will benefit his fellows ...'. Yet in much of contemporary moral philosophy, concern for one's own interests is considered a non-moral issue, while concern for the interests of others is paradigmatically moral. Indeed, a central issue in ethical theory involves the proper balance to be struck between prudence and morality, between the pursuit of one's own good and the pursuit of the good of others. When deliberating over what action to take, should one weigh one's own interests more heavily than those of others? Or is it possible to accommodate both self-interest and regard for others, to show that we have self-regarding reasons for helping others? The twelve essays in this volume - written from a range of perspectives - address these questions and examine related issues.

**Grand Dishes** Nov 14 2021 This is not a book about what

it's like to be old. It's about what it's like to have lived. There is no food quite like a grandmother's time-perfected dish. Inspired by their own grandmothers – and the love they shared through the food they served – Anastasia Miari and Iska Lupton embarked on a mission: from Corfu to Cuba, Moscow to New Orleans, and many more in between, they set out to capture cooking methods, regional recipes and timeless wisdom from grandmothers around the world. The result is *Grand Dishes*, a journey across four years of cooking with the world's grandmothers, a preservation not just of recipes but of the stories – told through the dishes – that have seasoned these grandmothers' lives. Featured alongside are contributions from celebrated chefs and food writers, each with their own grandmother's recipe to share. Rich with the insight that age brings, elegant portraits, diverse recipes, and techniques unique to a region, a grandmother and her family, this is a book to pass down through generations.

**The Other Side of Suffering** Jan 16 2022 "In this book, I

address a perennial question: how does one find his or her way to the other side of suffering after a catastrophic disaster or other personal tragedy? The answer I suggest comes from coastal residents who survived the 2005 Atlantic Hurricanes Katrina and Rita. Those who have lost homes and communities can provide an authentic and relatable example for other people faced with a life changing tragedy. In the first section, historic perspectives on disasters and their human impacts are considered. Two coastal parishes (counties) in south Louisiana are highlighted as a natural context for intergenerational knowledge of hurricanes and severe weather events. The Katrina experience is documented through entries in a survivor's personal journal. In the second section, six research-based principles of healing are presented: faith and humor, respect and gratitude, and acceptance and silver linings. Colorful case illustrations and direct quotes from Katrina survivors bring these principles to life. In the third section, post-disaster grief, the new normal after a disaster, and four obstacles that can delay or derail the process of healing are explored. Recovering daily routines and holiday observances provide direction as life goes on after a disaster. The voices of coastal residents who survived the Katrina tragedy offer a message of hope and healing after disaster for all who will listen. Their lives demonstrate quite convincingly that people can overcome catastrophic loss and regain a sense of joy in daily living in the years after a disaster or other life altering tragedy"--
